

FEEDBACK MAINTAINER

OBJECTIVE: To create a user friendly teacher-student feedback form that contains:

- Login page for students. Only students with login credentials can give the feedback.
- Each teacher's performance is ranked as poor (0), good (1), very good (2) and excellent (3).
- Portal includes the number of courses the student has taken along with name of faculty.
- Take 30 students, 5 teachers and 8 courses.
- Once all feedback are done, generate a summary of poor, good, very good and excellent feedback for each faculty and each course. Also conclude which faculty is better for a particular course.

USE CASE:

TOPICS COVERED IN PROJECT:

- String Handling
- Exception Handling
- Collections Framework
- Swing and AWT
- Event Handling
- Database handling in java
